

ANCOR

MARINE GRADE™ PRODUCTS
A Lasting Solution.

At Ancor, we provide Marine Grade™ products that stand up to this punishing environment – without flinching. Every product we make, from tinned copper wire to insulated connectors to a complete line of hand tools, is designed to withstand the rigors of life on the water. Our wiring products are the most long lasting, flame-retardant and rugged available. And our full complement of products means that you're assured of Marine Grade™ quality throughout your boat's electrical system.

Ancor is a Marincó Electrical Group (MEG) brand. With the combined brand power of Ancor, Marincó, Guest, AFI, Nicró and BEP, the Marincó Electrical Group is a leading supplier of electrical products and accessories to the marine industry. Boat builders specify MEG brand products. MEG brand products are available at leading marine retailers and dealers worldwide. Chances are, there's an MEG brand product aboard your boat. We're proud to set sail with you.

You can count on Ancor Marine Grade™ Products to help you meet today's challenge on the water. For more information on other Marincó Electrical Group brands, please see page 118 or log on to www.marincó.com

Why is Ancor Marine Grade™ Wire Different?

ANCOR Marine Grade™ Wire is manufactured from individual copper wire strands, tinned to resist corrosion from salt and moisture found in the marine environment.

Our wire lasts up to 10 times longer with better conductivity than bare copper wire and the proprietary compound used for our insulation resists salt water, battery acid, oil, gasoline, ultra-violet radiation, heat and abrasion. ANCOR wire insulation also contains 20% more polymers to prevent scalloping and increase flexibility.

So...which wire will you choose for your boat?

American Boat & Yacht Council Standards for Boats E-11*

The construction of insulated cables and conductors shall conform with the requirements of: 11.16.1.2.2.1. UL 1426, Cables for Boats...” 11.16.1.2.2.”

“Conductors shall be at least 16 AWG. EXCEPTIONS: 1. 18 AWG conductors may be used if included with other conductors in a sheath and do not extend more than 30 inches (760mm) outside the sheath.” 11.16.1.1.2.

“Conductors shall have a minimum rating of 600 volts.” 11.16.1.3.3. “The temperature rating of conductors and flexible cords shall be at least 140°F (60°C) dry.” 11.16.1.3.1.

“In engine spaces, 11.16.1.3.4.1. the insulation shall be oil resistant, and 11.16.1.3.4.2. the temperature rating shall be at least 167°F (75°C) dry.” 11.16.1.3.4.

“Minimum surface marking of the individual conductors and their jackets shall include: 11.16.1.1.1.1. type/style, 11.16.1.1.1.2. voltage, 11.16.1.1.1.3. wire size, and 11.16.1.1.1.4. temperature rating, dry.” 11.16.1.1.1.

“All conductors and flexible cords shall meet the flame retardant and moisture resistant requirements of UL 83, Thermoplastic-Insulated Wires and Cables.” 11.16.1.3.5.

“Conductors used for panelboard or switchboard main feeders, bilge blowers, electronic equipment, navigation lights, and other circuits where voltage drop must be kept to a minimum, shall be sized for a voltage drop not to exceed three percent”. (See Table B)

Conductors used for lighting, other than navigation lights, and other circuits where voltage drop is not critical, shall be sized for a voltage drop not to exceed 10 percent.” 11.16.1.2.7. (See Table C)

“When AC and DC conductors are run together, the AC conductors shall be sheathed, bundled, or otherwise kept separate from the DC conductors.” 11.16.4.1.5.

“Wiring shall be installed in a manner that will avoid magnetic loops in the area of the compass and magnetically sensitive devices. Direct current wires that may create magnetic fields in this area shall run in twisted pairs.” 11.16.4.2.1.

“Current-carrying conductors shall be routed as high as practicable above the bilge water level and other areas where water may accumulate. If conductors must be routed in the bilge or other areas where water may accumulate, the connections shall be watertight.” 11.16.4.1.6.

“Loom used to cover conductors shall be self-extinguishing. The base product (or resin) shall be classified as V-2 or better, in accordance with UL 94, Tests For Flammability Of Plastic Materials.” 11.16.4.1.9.

“Conductors shall be supported throughout their length or shall be secured at least every 18 inches (455mm) by one of the following methods:” 11.16.4.1.10.

“By means of non-metallic clamp sized to hold the conductors firmly in place. ...The material shall be resistant to oil, gasoline, and water and shall not break or crack within a temperature range of -34°C (30°F) to 121°C (250°F);” 11.16.4.1.10.1.

“By means of metal clamps lined with an insulating material resistant to the effects of oil, gasoline, and water.” 11.16.4.1.10.3.

“Terminal connectors shall be the ring or captive spade types.” 11.16.3.4.

“Twist on connectors, i.e., wire nuts, shall not be used.” 11.16.3.6.

“Ring and captive spade type terminal connectors shall be the same nominal size as the stud.” 11.16.4.1.12.

“Solder shall not be the sole means of mechanical connection in any circuit.” 11.16.3.7.

“Solderless crimp on connectors shall be attached with the type of crimping tools designed for the connector used, and that will produce a connection meeting the requirements of E-11.16.3.3.” 11.16.3.8.

“The shanks of terminals shall be protected against accidental shorting by the use of insulation barriers or sleeves, except for those used in grounding systems” 11.16.3.9.

“Conductors that may be exposed to physical damage shall be protected by self-draining; loom, conduit, tape, raceways, or other equivalent protection.” 11.16.4.1.8.

ANCOR meets or exceeds all national and international standards in the marine industry, including:

Underwriters Laboratories Inc.

Cables for Boats, UL 1426 (BC-5W2), 105° C 600 volts

United States Coast Guard

CFR Title 46, Subchapter T Under 50 volts: Parts 183.05 - 45

50 volts and over: Parts 183.10 - 20

Safety for Small Craft E-8 (AC Systems), E-9 (DC Systems)

National Fire Protection Association

Section 302

Specification Reference:

Electric Wire & Cable to be Marine Grade”, UL BC-5W2: Two conductor for 12 volts and three conductor for 120 volts as manufactured by ANCOR, Napa, CA

ANCOR is a Member:

SOCIETY OF ACCREDITED MARINE SURVEYORS®

ANCOR strongly endorses and recommends the ABYC “Safety Standards for Small Craft.” Written through the cooperative efforts of leaders from all segments of the boating industry, and interested public, these standards represent the best way to insure safety.

* Reprinted with permission by the American Boat & Yacht Council. This is not the full text of E-11 of the ABYC standards. It is in response to some of the most commonly asked questions.

“Can I use ‘regular wire’ for my boat?” The answer to this common question is a qualified “yes,” if the wire is SAE (Society of Automotive Engineering) J378, J1127 or J1128. These wires are designed for “surface vehicles,” not for the special requirements of the marine industry, but meet the minimum standards for boats in limited circumstances. Even if tinned copper, they should not be run in bilge spaces or other areas subject to moisture from spray or dripping. They should not be run in engines spaces, unless marked “oil resistant” and “75°C”. They should not be used in applications where subjected to vibration or frequent flexing and must never be used for 110 volt applications. For safety, use only wire which is marked with size and type.

Most importantly, SAE wire is up to 12% smaller than

AWG Boat Cable which means that, in many applications, larger gauge wire must be used to stay within the voltage drop limits recommended by experts (see Tables C & D). The wire charts found in “Chapman’s Piloting” and other publications are all for “AWG” wire like **ANCOR**, not “SAE” type wire.

Using the wrong type of wire can cost you more in the long run. Insist on Marine Grade™ Boat Cable by **ANCOR**. It is UL approved for the corrosive marine environment and charter boat service. Marine Grade™ Boat Cable is specially designed to exceed all test standards for cold bend, moisture and oil resistance, heat shock and flammability. This ensures the safest, easiest to install, longest lasting and ultimately the least expensive electrical system you can buy. Only ANCOR offers a complete line of Marine Grade™ Boat Cable for every need.

TABLE A: MARINE COLOR CODE

| Color | Item | Use |
|--|---------------------------|---|
| Red | DC Positive Conductor | Positive Mains |
| Black or Yellow | DC Negative Conductor | Return, Negative Mains |
| Green or Green w/ Yellow Stripe | DC Grounding Conductor | Bonding System Bonding Wires (if insulated) |
| Light Blue | Oil Pressure | Oil Pressure Sender to Gauge |
| Dark Blue | Cabin & Instrument Lights | Fuse or Switch to Lights |
| Brown | Generator Armature | Generator Armature to Regulator |
| | Alternator Charge Light | Generator Terminal/Alternator Auxiliary Terminal to Light to Regulator |
| | Pumps | Fuse or Switch to Pumps |
| Grey | Navigation Lights | Fuse or Switch to Lights |
| | Tachometer | Tachometer Sender to Gauge |
| Orange | Accessory Feed | Ammeter to Alternator or Generator Output and Accessory Fuses or Switches |
| | Common Feed | Distribution Panel to Accessory Switch |
| Pink | Fuel Gauge | Fuel Gauge Sender to Gauge |
| Purple | Ignition | Ignition Switch to Coil & Electrical Instruments |
| | Instrument Feed | Distribution Panel to Electric Instruments |
| Brown w/ Yellow Stripe | Bilge Blowers | Fuse or Switch to Blower |
| Yellow w/ Red Stripe | Starting Circuit | Starting Switch to Solenoid |
| Tan | Water Temperature | Water Temperature Sender to Gauge |
| Green/Stripe (G/x) (except G/Y) | Tilt Down and/or Trim In | Tilt and/or Trim Circuits |
| Blue/Stripe (Bl/x) | Tilt Up and/or Trim Out | Tilt and/or Trim Circuits |

TECHNICAL DATA

Table B:
Conductors
Sized (AWG) for
3% Voltage Drop

Use 3% voltage drop for any "critical application" affecting the safety of the vessel or its passengers: bilge pumps, navigation lights, electronics, etc....

IMPORTANT!

Length (feet): Determined by measuring the length of the conductor from the positive (+) power source connection to the electrical device and back to the negative (-) power source connection. Note that the power source connection may be either the battery, panelboard or switchboard.

Current (amps): Determined by adding the total amps on a circuit. Conductor sizes not covered in Table B or Table C may be calculated by using the following formula:

$$CM = \frac{K \times I \times L}{E}$$

After calculating the Circular Mil Area (CM), use Table E to determine the proper conductor size (National Fire Protection Agency and Coast Guard require that the next larger conductor be used when the calculated CM area falls between the two conductor sizes).

CM = Circular Mil Area of Conductors
K = 10.75 (Constant representing the mil-foot resistance of copper)
I = Current - amps / **L** = Length - feet
E = Voltage drop at load (in voltage drop in a decimal expression)

For Example...

Q: A bilge pump draws 10 amps. The positive run is 11 feet from the power panel, including the float switch. The negative run is only 10 feet. What size is the wire?

A: Use the formula to reach the correct answer:

Table D shows that 12 AWG wire has a CM area of 6,500 and is the correct choice. However, SAE wire has a CM area of only 5,833. Under NFPA and USCG regulations, 10 SAE wire must be used.

| Length | Current (amps) | | | | | | | | | | | 3% VOLTAGE DROP AT 12 VOLTS | |

ABYC Recommends...
“Conductors used for panelboard or switchboard main feeders, bilge blowers, electronic equipment, navigation lights, and other circuits where voltage drop must be kept to a minimum, shall be sized for a voltage drop not to exceed three percent. Conductors used for lighting, other than navigation lights, and other circuits where voltage drop is not critical, shall be sized for a voltage drop not to exceed 10 percent.” 11.16.1.2.7.

Table D: Conductor Sizes

| AWG | Sq. mm | AWG CM area | SAE CM area | Ampacity Engine Space | |
|-----|--------|-------------|-------------|-----------------------|--------|
| | | | | Outside | Inside |
| 18 | 0.8 | 1,600 | 1,537 | 20 | 17 |
| 16 | 1 | 2,600 | 2,336 | 25 | 21 |

Table E: Temperature Rating of Conductor Insulation

The Law

The Code of Federal Regulations (CFR) 183.425 Conductors

- (b) Except for intermittent surges each conductor must not carry a current greater than that specified in Table E for the conductor's gauge and temperature rating.
- (c) For conductors in engine spaces, amperages must be corrected by the appropriate correction factor in note 1 of Table E.

Due to engine heat, the ambient temperature in engine spaces is usually higher than in other spaces of the boat. Wiring in and passing through engine spaces must be able to operate at these higher ambient temperatures. The ampacity values in Table E are based on an ambient temperature of 30° C (86° F) which is considered reasonable for use on boats except in engine spaces. The correction factors in Note 1 in Table E convert the ampacities to Table E to acceptable values in an ambient temperature of 50° C (122° F). This higher temperature has been selected as satisfactory for engine spaces. Note 1 is supplied to eliminate the need for calculating the corrections to Table E. The values are already corrected.

| Conductor Size (AWG) | Ampacity Outside of Engine Space | Ampacity Inside of Engine Space (Note 1) |
|----------------------|----------------------------------|--|
| 18 | 20 | 17 |
| 16 | 25 | 21 |
| 14 | 35 | 30 |
| 12 | 45 | 38 |
| 10 | 60 | 51 |
| 8 | 80 | 68 |
| 6 | 120 | 102 |
| 4 | 160 | 136 |
| 3 | 180 | 153 |
| 2 | 210 | 178 |
| 1 | 245 | 208 |
| 1/0 | 285 | 242 |
| 2/0 | 330 | 280 |
| 3/0 | 385 | 327 |
| 4/0 | 445 | 378 |

*De-rating for engine space is 0.85 for 105° C (221° F) rated wire.

Table F: Allowable Amperage of Conductors of 50 Volts or More

The current values shown in Table F and also on Table D do not consider voltage drop for conductors under 50 volts. The values shown on the ampacity table are the maximum safe amperages which the conductor can carry on a continuous basis. They do not apply to intermittent starting loads such as motor start currents. Since all **ANCOR Boat Cable** is 105° C insulated, only that temperature rating is shown.

Due to the higher ambient temperatures in engine spaces and the heat retention of large wire bundles, a “correction factor” must be used to derate the wire by increasing conductor size. Table F takes into consideration these factors and should be used to select conductor sizes for circuits over 50 volts. Note that for electrical systems under 50 volts, voltage drop is the controlling factor and the tables on pages 14 and 15 should be used.

| Conductor Size (AWG) | 2 Conductors 105° C (221° F) | | 3 Conductors 105° C (221° F) | | 4 to 6 Conductors 105° C (221° F) | | 7 to 24 Conductors 105° C (221° F) | |
|----------------------|---------------------------------|---------------------|---------------------------------|---------------------|--------------------------------------|---------------------|---------------------------------------|---------------------|
| | Outside Engine Space | Inside Engine Space | Outside Engine Space | Inside Engine Space | Outside Engine Space | Inside Engine Space | Outside Engine Space | Inside Engine Space |
| | 18 | 20 | 17.0 | 14.0 | 11.9 | 12.0 | 10.2 | 10.0 |

| 3/0 | 385 | 327.3 | 269.5 | 229.1 | 231.0 | 196.4 | 192.5 | 163.6 |
| 4/0 | 445 | 378.3 | 311.5 | 264.8 | 267.0 | 227.0 | 222.5 | 189.1 |

Table F is supplied to eliminate the need for calculating the corrections for multi-conductor cable bundles to Table E. The values are already corrected.

| Number of current carrying conductors: | Correction Factor |
|--|-------------------|
| 3 | 0.70 |
| 4 to 6 | 0.60 |
| 7 to 24 | 0.50 |
| 25 and above | 0.40 |

- Note: These tables only apply for 105° C (221° F) wire and other premium wire and should not be used for lesser grades of wire and cable.
- Reprinted at the courtesy of the United States Coast Guard Electrical System Compliance Guideline.
- * There is NO LIMIT on conductors in a bundle under 50 Volts.

TECHNICAL DATA

FREQUENTLY ASKED QUESTIONS

What size wire do I need?

There is two different ways to find your answer. First, refer to pages 14 and 15. Find the correct voltage chart 12, 24, or 32 and the correct voltage drop chart, 3% (critical applications) or 10% (standard application). Measure the distance of your electrical run (to and from the power source because a circuit is circular). Now go down the "length" column heading until you find the correct length always round up). Move across until you find the correct Amps closest to that which you are sizing wire for (use the heading along the top of the table and always round up). Where these two columns meet you will find the correct size of wire.

Second, reference the charts on pages 14 and 15. You will find a formula and charts you can use to find the correct wire gauge. After completing the formula, match the number you received from the formula to the number in Table D. Be sure to use the AWG when using ANCOR Wire.

Why is ANCOR recommending using "safety" duplex with Yellow & Red inner conductors?

ANCOR recommends yellow wire as DC negative because black is the standard color for AC hot. There have been many cases of people working on their DC systems who have inadvertently cut the live AC wire. Because of the wide spread use of inverters, power generators and shore power connections, even today's smallest boats pose a risk of inadvertently cutting into AC wires when working on DC systems.

How much additional light does the Halogen Lamp produce compared to a General Lamp?

50% more light

What is the advantage of using a Double Crimp Terminal?

The Double Crimp Terminal has an extra barrel which, when crimped, will remove all strain from the wire stranding and place the strain on the wire jacket. This prevents terminations from loosening under stress, pull or vibration all of which are common in the marine environment.

What is the shrink ratio of ANCOR heat shrink and is it adhesive lined?

The shrink ratio is 3 to 1 and Yes the heat shrink is adhesive lined.

Do you recommend soldering or crimping terminals?

ANCOR recommends crimping vs. soldering. Per ABYC standards (E-11.16.3.7), "Solder shall not be the sole means of mechanical connection in any circuit". Further, crimping provides a solid mechanical connection resistant to "cold joints", breaking under fatigue and removes strain when using ANCOR double crimp nylon connectors.

Why is the RG59U Bare Copper and not stranded?

The RG59U is used for TV's & SAT NAV's. If the RG59U were Stranded, the stranding of the wire would fold at the time of insertion. After tinning wire the stranding become very soft. In the application of TV & SAT NAV's, the wire needs to be very strong.

Are your Circuit Breakers ignition protected?

No, but ignition protected breakers can be special ordered for you with a minimum quantity.

Are your Rocker Switches Ignition Protected & Waterproof?

The rocker switches are ignition protected, and once installed, waterproof on the front face only (not submersible).

WIRE & CABLE

ANCHOR MARINE GRADE

PRIMARY WIRE

- **ANCOR** Marine Grade™ wire is manufactured from tinned copper stranding for maximum protection against corrosion and electrolysis. Ultra flexible (Type 3) stranding resists fatigue due to vibration and flexing.
- **ANCOR**'s proprietary premium vinyl insulation stays flexible even in extreme cold and resists salt water, battery acid, oil, gasoline and ultra-violet radiation. Exclusive insulation is rated at 600 volts, 105° C dry and 75° C wet, and is resistant to heat and abrasion.
- Exceeds all UL 1426, US Coast Guard Charterboat (CFR Title 46) and ABYC standards.
- **ANCOR** supplies a full line of Marine Grade™ primary (single conductor) wire in sizes from 18 AWG to 10 AWG, all in ABYC recommended colors, and in standard lengths from 8 foot mini-spools to 1,000 foot bulk spools.

"To avoid...electrical problems

- Make high quality terminations that are clean, tight, and water/moisture resistant
- Use high quality, marine related materials, including Type III tinned copper, marine wire.
- Calculate and select adequate wire size".

Gord May

GOOD OLD BOAT Magazine

ABYC Recommends:

"Conductors shall be at least 16 AWG. Exception: 18 AWG conductors may be used if included with other conductors in a sheath and do not extend more than 30 inches outside the sheath."

E-11.16.1.1.2

"A...enemy of on-board electrical wiring is the long list of substances and conditions that can deteriorate insulation. Consider sunlight: Any above-deck wires that are exposed to sunlight, even if it's just reflected, should have a UV-resistant sheath."

Hydrocarbon-based liquids such as oil, fuel and some cleaning products can be extremely corrosive to many plastics. Ergo, all wiring in the engine compartment should be rated for oil and chemical resistance".

Tom Thompson

SPORT FISHING Magazine

AUTOMATIC WIRE STRIPPER

Item Number: 702030

- Made of reinforced polyimide
- Automatically adjusts to different wire sizes.
- Strips without damage or marking of conductors, slim jaw for easy access, steel side cutter.
- Capacity: Strips and cuts wire from 24 AWG /0.2 mm² to 12 AWG /3 mm².
- Wire stop adjusts length of strip from 3/8" /9.5 mm to 1/2" /12.7 mm.

BATTERY CABLE

- **ANCOR** Marine Grade™ wire is manufactured from tinned copper stranding for maximum protection against corrosion and electrolysis. Ultra flexible (Type 3) stranding resists fatigue due to vibration and flexing.
- **ANCOR**'s proprietary premium vinyl insulation stays flexible even in extreme cold and resists salt water, battery acid, oil, gasoline and ultra-violet radiation. Exclusive insulation is rated at 600 volts, 105° C dry and 75° C wet, and is resistant to heat and abrasion.
- Exceeds all UL 1426, US Coast Guard Charterboat (CFR Title 46) and ABYC standards.

BATTERY CABLE STRIPPER

Item Number: 702065

- Adjustable blade cutting height, comes with extra blades.
- Easily adjusts to various cable thickness. Swivel blade for stripping up wire as well as around.
- Good for stripping duplex and triplex.
- Comes with extra swivel blade.

DUPLEX AND TRIPLEX CABLE

- **ANCOR** Duplex, Triplex and Multi-Conductor Cables are made to surpass the highest UL Boat Cable standards with ultra flexible (Type 3/Class K) stranding to resist fatigue due to vibration and flexing.
- Outer jacket is made for easy removal and provides the best abrasion resistance available.
- **ANCOR**'s proprietary premium vinyl insulation stays flexible even in extreme cold and resists salt water, battery acid, oil, gasoline and ultra-violet radiation. Exclusive insulation is rated at 600 volts, 105° C dry and 75° C wet, and is resistant to heat and abrasion.
- Inner conductors are correctly color-coded to ABYC standards.

SAFETY DUPLEX CABLE **UL 1426 Tinned Boat Cable**

Features red and yellow Marine Grade™ primary conductors in a white common jacket.

| 12/2 | 13/32 | 80 |
| | 10.3 mm | 36.3 kg |

ANCOR recommends yellow wire as DC negative because black is the standard color for AC hot. There have been many cases of people working on their DC systems who have inadvertently cut the live AC wire. Because of the wide spread use of inverters, power generators and shore power connections, even today's smallest boats pose a risk of inadvertently cutting into AC wires when working on DC systems.

DUPLEX AND TRIPLEX CABLE

LIVE WIRE

Item Number: 702034

- Adjustable sensitivity allows tracing of unshielded wires directly behind walls, at switches or receptacles, or at low-voltage locations.
- Visual (flashing) and audible (beeping) indicators signal presence of voltage.
- Adjustable sensing levels.
- Built in "safe test" feature assures batteries are operating properly.

HEAVY DUTY CABLE CUTTER

Item Number: 702006

- Precision ground and sharpened blades
- High strength steel
- Longer handle allows easier cuts with less strain.
- Lightweight fiberglass handles feature comfortable rubber grips
- Cuts up to 350 MCM (2 sizes larger than 4/0 AWG cable)
- Cuts non-ferrous cables up to 350 MCM /177 mm² (2 sizes larger than 4/0 AWG /103 mm²).

WIRE DISPLAY Item Number: DR0034

Wire Rack comes with four rods. This rack contains **ANCOR's** most popular UL 1426 Tinned Boat Cable. It comes in 100' wire spools. 26" /65 cm wide x 36" /90 cm high.

WIRE MERCHANDISER

COMPLETE WIRE MERCHANDISER Item Number: DR1086

The DR1086 is **ANCOR's** premier Marine Grade™ Wire Merchandiser offering the most popular colors and sizes of primary wire, battery cable, duplex, triplex, coaxial cable, instrument, ribbon, trailer and safety cable. Also included are our top-selling, professional grade tools. The display comes complete with a planogram, hooks, re-order tags and five heavy duty steel wire baskets designed to dispense the spools of wire. DR1087 Merchandiser Display is the same as the DR1086 minus the gondola.

COAXIAL CABLE AND ASSEMBLIES

COAXIAL CABLE Premium Tinned Copper

made in 

- Features signal loss ratios of up to 50% less than other coaxial cables.
- Tinned copper center conductor as well as tinned copper outer braid for corrosion resistance and easy soldering.
- 96% braid for best signal strength and least interference with UV inhibited white jacket for longest life.

ANCOR Recommends

- RG 58CU for interconnecting electronic equipment.
- RG 59U for TVs and some SAT NAVs.
- RG 8X for VHF runs less than 50 feet.
- RG 8U for VHF runs over 50 feet.

COAXIAL CABLE ASSEMBLIES

Premium Tinned Copper

- All assemblies come with **ANCOR** Adhesive Lined Heat Shrink to seal out moisture, provide strain relief and fight corrosion.
- 96% Tinned copper braid for optimum protection against signal loss.
- One end pre-assembled coaxial cable packages for RG58 and RG8X come with **ANCOR**'s twist-on UHF plugs for easy installation.
- No solder or special tools required.
- Special low loss SAT NAV extensions.

made in 

COAXIAL CABLE STRIPPER

Item Number: 702050

- Made of fiberglass reinforced polyimide.
- Sharp blades strip outer and inner insulation of coaxial.
- Will not damage center conductor or braided shield.
- Marked for easy stripping length.
- Capacity: Strips RG58, RG59, RG8X and RG6U.

BATTERY CABLE ASSEMBLIES

PREMIUM BATTERY CABLE ASSEMBLIES UL-1426 Tinned Boat Cable

ANCOR Marine Grade™ Standard Battery Cable Assemblies are manufactured with **ANCOR**'s premium UL1426 tinned copper battery cable. The battery cable is fine stranded to produce maximum conductivity and flexibility. In addition, all **ANCOR** battery cable is flame retarded, UV inhibited, rated to 600V and 105°C. The lugs are tinned copper to avoid corrosion and last longer. Each end has a piece of **ANCOR**'s adhesive lined 3:1 heatshrink tubing placed over the electrical connection. The heatshrink tubing seals out moisture and other corrosive elements found in the marine environment, and provides strain relief to ensure a longer lasting battery connection.

PREMIUM BATTERY CABLE ASSEMBLY DISPLAY Item Number: DR1801

Display consists of battery cable assemblies manufactured with **ANCOR**'s premium UL1426 tinned copper battery cable, tinned copper lugs and adhesive lined heat shrink tubing. Assortment packs and supporting tools also included. Display comes with heavy duty gridwall, full-color planogram, hooks, re-order tags and assembly instructions. DR1802 Display is the same as the DR1801 minus the gridwall, & hooks.

TERMINALS & CONNECTORS

BUTT CONNECTORS

ANCOR supplies a full line of nylon, insulated, tinned copper terminals for the highest quality electrical systems.

ANCOR's Marine Grade™ terminals differ from automotive terminals by being designed for the harsh marine environment.

Our nylon insulators are easy to crimp and will not split. Our barrels are designed to tightly grip the wire with the least effort. Our tinned copper gives the least electrical resistance but the most corrosion protection.

BUTT CONNECTORS

Nylon Insulated Seamless (Single Crimp) • UL 486C

ANCOR TIP:

One of the most common electrical problems and potential sources of fire is a terminal that is loose on the terminal stud or loose on the wire.

This creates a high resistance path and overheating. Be sure to use the proper size terminal and the proper crimp tool. Double crimp to provide strain and fatigue relief. Install ANCOR adhesive lined heat shrink tubing to water proof the connection.

Crimping Instructions for Double Ratchet Crimper #701030

Strip 5/16" of insulation off the wire exposing the conductor. (ANCOR's 702030 Wire Stripper can be adjusted for the required stripping length).

To open the tool, close the handles past the ratchet release position which will allow the jaws to open fully.

Make sure the terminal is compatible with the wire size you are using. When placing the terminal into the appropriate color-coded cavity make sure the ring portion of the terminal is parallel to the crimping die.

Important! When placing the terminal into the appropriate color-coded nest make sure the area to be crimped onto the exposed wire strands is opposite the colored dot and on the smooth arc side of the die. The opposite colored dot side of the die with the indent in each cavity is designed to put the second crimp in the insulation portion of the wire.

Close the tool carefully until the jaws grip the terminal lightly and hold it in place without distortion.

Insert the properly stripped wire into the terminal allowing the wire to stick out 1/32" beyond the edge of the terminal barrel. Make sure the strands do not extend into the contact area.

Holding the wire in place, squeeze the handles past the ratchet release position and allow the jaws to spring open. The crimp is now complete.

Check the finished crimp to see that the wire is held firmly in place.

STAINLESS STEEL CUT/ STRIP/CRIMP TOOL

Item Number: 701009

- Crimps 10-22 AWG insulated and non-insulated terminals and coaxial connectors
- Cut and strip 8-22 AWG solid and 10-24 AWG stranded wire
- Cut and rethread 4-40, 5-40, 6-32, 8-32, 10-24, 10-32 screws
- Stainless steel blade resists corrosion and nicking
- Dual GRIP™ is easier on wrists
- Over molded ergonomic handles for comfort
- Laser etched permanent markings
- Precision ground plier nose

PIN TERMINALS

Nylon Insulated with Insulation Grip
Double Crimp, Funnel Entry • UL 310

- Recommended for use with Pin Terminal Blocks for strain relief.
- Tinned copper for maximum corrosion resistance and greatest electrical conductivity.
- Grooved barrel grips wire to provide superior holding power and current flow.
- Nylon insulator resists sunlight, gasoline, oil and chemicals – will not punch through.
- Crimp ridge positions the crimp tool to prevent mis-crimps.
- Brass sleeve crimps on wire insulation to provide fatigue and strain relief.
- Funnel entry guides wire into position and prevents strand turnback.

DOUBLE CRIMP RATCHET TOOL

Item Number: 702017

- Ratcheting action insures positive crimp, includes release lever.
- Two nests in crimp cavity simultaneously crimp conductor and insulation for maximum strain and fatigue relief.
- Compound lever handle for operator ease.
- Capacity: Crimps 22 - 10 AWG /0.3-5 mm² terminals and connectors in three color-coded cavities.

Times have definitely changed in the connector world. Once upon a time, you couldn't get a better connection than a good soldering job. Today, you should use solder sparingly. Soldering the end of a wire before attaching it to a screw terminal can prevent the strands from compressing fully, increasing the connections electrical resistance. Excess solder also travels along a conductor (wire) and stiffens it, making the wire more susceptible to failure from vibration.

Tom Thompson
SPORT FISHING Magazine

ANCOR QUICK CONNEX KITS & CONNECTORS

- Each kit contains 2, 50 amp housing units, four silver plated connectors in either 8 AWG or 6 AWG & heat shrink tubing
- Quick and easy battery charge with high quality parts; attach one to power source and have one for each motor. Ideal amperage for trolling motors
- Can be permanently affixed or easily disconnected for changing needs
- Heat shrink tubing creates water, oil and acid resistant seal preventing corrosion at the electrical connection. Provides strain relief to connection, helps eliminate wire pull out
- No need for bulky hand tools to hook up battery system

| Amps | Kit Description | Item Number |
|------|--|-------------|
| 50 | Black housing w/ four 8 AWG connectors & blk/red/ylw H.S. Tubing | 248008 |
| 50 | Black housing w/ four 6 AWG connectors & blk/red/ylw H.S. Tubing | 248006 |

| Amps | Connector Replacement Description | Item Number |
|------|---|-------------|
| 50 | Four 8 AWG connectors & blk/red/ylw H.S. Tubing | 248108 |
| 50 | Four 6 AWG connectors & blk/red/ylw H.S. Tubing | 248106 |

225 PIECE TWIN KIT

Electrical Repair Kit with Strip/Crimp Tool
Item Number: 220020

- 55 assorted butt connectors.
- 95 assorted ring terminals.
- 35 assorted disconnects.
- 35 assorted nylon cable ties.
- Assorted, 10' spools of UL 1426 Boat Cable.
- 5 pieces (3" x 3/8") 3:1 shrink ratio, colored heat shrink tubing.
- Opens both sides.

DRY SEAL CONNECTORS

DRYSEAL™ CONNECTORS

- Dry Seal™ Connectors are truly submersible, rated operable from -40° F to 221° F, under conditions of salt water spray and severe vibration.
- Sealing integrity is maintained even with exposure to gasoline, diesel fuel, anti-freeze, ozone and ultraviolet light to 3 feet.
- Seals intact under harsh conditions.
- Resistant to chemical exposure. One-piece, molded body.
- Polarized against mismatches.

| Cable Size | Description | Conductor Colors | Qty/Pkg | Item Number |
|--------------------------------------|----------------------|------------------|---------|-------------|
| 14/2 2 x 2 mm ² | Two Conductor | Red, Yellow | 1 | 249003 |
| 6 13 mm ² | One Conductor | Black | 1 | 249013 |

| 14/2 2x2 mm ² | Two Conductors | Red, Yellow | 1 | 249007 |

14 AWG Rated to 400V AC, 15 Amps.
 6 AWG Rated to 400V AC, 85 Amps.
 Temp. rated -40° to 221°F (-40° to 105°C).

ABYC Recommends:

“Current-carrying conductors shall be routed as high as practicable above the bilge water level and other areas where water may accumulate. If conductors must be routed in the bilge or other areas where water may accumulate, the connections shall be watertight. “11.16.4.1.6.”Current-carrying conductors shall be routed as high as practicable above the bilge water level and other areas where water may accumulate. If conductors must be routed in the bilge or other areas where water may accumulate, the connections shall be watertight.”11.16.4.1.6.

600 PIECE NYLON INSULATED CONNECTOR KIT Item Number: 250001

- 200 Assorted 22-10 Butt Connectors.
- 300 Assorted 22-10 Ring Terminals.
- 25 Each 16-14 Fully Insulated Male & Female Disconnects.
- 25 Each 16-14 #8 & #10 Flanged Spade Connectors.
- 25 16-14 Female Disconnects.
- 25 12-10 Fully Insulated Female Disconnects.

See Page 111 for the entire selection of ANCOR kits

SOLDERING TIPS

Remember these important guidelines when soldering is required:

The wire and terminal must be clean and free from corrosion. Wire conductors which are oxidized or corroded (black or green in appearance) should never be used.

Select the proper solder. Low temperature: 40% Lead - 60% Tin; Rosin flux.

Solder melts at about 375° F. Care should be taken not to overheat the wire or terminal, as damage can occur.

The solder joint should be bright and shiny. A dull appearance might indicate a cold joint which will fail prematurely.

Do not use too much solder. Capillary action will "wick" solder through the end of wire. After cooling, mechanical disturbances, such as vibration or flexing, can cause this "hard spot" to fracture and disrupt continuity.

Installation Instructions for Twist-On Connectors

To install **ANCOR** twist-on connectors, strip the cable to expose 9/16" of the center conductor. Strip the outer jacket to expose 1/4" of the braid. Make sure that the braided shield does not touch the inner conductor.

Insert the cable into the connector until the center conductor protrudes through the center of the connector.

Twist the small knurled end while gently pushing the connector onto the cable until resistance is felt. Crimp or solder the center conductor.

Cut off any excess. It is strongly recommended that a piece of **ANCOR** 3/4" heat shrink be installed on all exterior UHF connectors to waterproof and relieve strain.

ABYC Recommends

Solder shall not be the sole means of mechanical connection in any circuit. If soldered, the connection shall be so located or supported as to minimize flexing of the conductor where the solder changes the flexible conductor into a solid conductor.

NOTE: When a stranded conductor is soldered, the soldered portion of the conductor becomes a solid strand conductor, and flexing can cause the conductor to break at the end of the solder joint unless adequate additional support is provided. 11.16.3.7.

CONNECTOR KITS

PREMIUM CONNECTOR KITS

Nylon Insulated with Insulation Grip • Double Crimp, Funnel Entry

UL and CSA listed.

20 AMP sizes use #6 - 32 /4 mm screws for up to 12 AWG /3 mm² wire.

30 AMP sizes use #8 - 32 /4.8 mm screws for up to 10 AWG /5 mm² wire.

All terminals are nickel-plated brass.

JUNCTION BLOCK

| Description | Size Stud Size(in) | Amps | Qty/ Pkg | Item Number |
|----------------|-----------------------|------|-------------|----------------|
| Surface | 3/8 9.5 mm | 250 | 1 | 553080 |

Stud-type

Shorten multiple cable runs to common hot or negative power points.

Connect 8 AWG /8 mm² through 4/0 AWG /103 mm² battery cables.

Studs are high conductivity copper alloy material.

LUGS & BATTERY TERMINALS

HEAVY DUTY LUGS

- **ANCOR** Marine Grade™ lugs are manufactured from heavy duty annealed tinned copper, providing for maximum current flow.
- 100% tin plated copper resists corrosion from salt and moisture.
- Seamless barrel design allows for maximum strength when crimped.
- Closed end design seals out moisture so cables stay dry and corrosion free.

CRIMPING FACTS:

Fine stranded cables, those with a large quantity of small-diameter strands, will improve a crimped joint's performance. Finer strands more readily fill the inside contour of a terminal as it is crimped. This even distribution of strands allows imposed loads to be distributed more evenly.

Air pockets or voids in a crimp joint with coarse stranding increases resistance and temperature which in turn leads to a faster rate of corrosion.

PROFESSIONAL LUG CRIMPER

Item Number: 702040

- Calibrated adjustment screw.
- Compound lever action prevents operator fatigue.
- Capacity: Crimps 8 - 4/0 AWG /8-103 mm² lugs and terminals.

ANTI-CORROSION RINGS

Item Number: 260405

- Chemically treated to prevent terminal corrosion caused by acid leaks.
- Fit top or side battery posts.
- Place one on each post.

BATTERY TERMINAL CLEANER

Item Number: 700103

- High-impact construction.
- Wide, easy grip.
- Excellent for hard-to-reach batteries.

HEAVY DUTY LUG CRIMPER

Item Number: 701010

- Spring loaded pivot bar, designed for use with a hammer or vise.
- Makes UL approved crimps.
- Made from steel with a hardened pivot pin.
- Capacity: Crimps 6 - 4/0 AWG /13-103 mm² lugs and 6 - 3/0 AWG /13-81 mm² terminals.

Check out our entire line of Marine Grade™ electrical tools on page 91

COUNTER TOP LUG DISPLAY

Item Number: DR1425

Contains 25 sizes of heavy duty tinned copper lugs, 8 AWG to 2/0. Includes combo packs, battery terminals, and a heavy duty lug crimper. Display comes with full-color planogram, hooks, re-order tags and assembly instructions.

LEAD VS. TINNED COPPER TERMINALS

ANCOR battery terminals are 100% tin-plated and do not come loose or lose conductivity like lead terminals. Lead terminals are much softer and can loosen due to "cold flow" of the metal and are more subject to oxidation which leads to dangerous power losses.

Tinned copper terminals are up to 40% more conductive than lead terminals for optimum performance, especially with high amperage devices like inverters and windlasses.

MARINE JUMP START

| Description | Item Qty/ | Number |
|-----------------------------------|-----------|--------|
| Dual Marine Jump Star Unit | 1/1 | 553079 |

- Permanent, heavy duty, high amperage connection for trolling motors or charging.
- Water resistant snap caps when not in use.
- Special concave groove for positive non-slip connection with jumper cable clamp.
- Hexagonal center stud prevents rotation.
- Remotely charge battery to avoid sparking in engine area.

ADHESIVE LINED HEAT SHRINK PRODUCTS

ADHESIVE LINED HEAT SHRINK TUBING

- Cross Linked polyolefin tubing is much stronger than PVC tubing and will not burn like PVC.
- Heat activated adhesive lining provides impervious seal to salt water, oil, acids, and sunlight as well as providing strain relief.
- Highest shrink ratio - shrinks to 1/3 original size.
- Shrinks at 257° F/125° C.
- Operating temperature range of -40° C to 110° C.

BOX 'O SHRINK TUBING

Item Number: DR1228

Thirty-two 48" heat shrink tubes that range in size from 1/8" to 3/4". **ANCOR's** Adhesive Lined Heat Shrink Tubing insulates and protects connections from mechanical abuse, wire pullout and abrasion. The heat activated adhesive melts and flows under pressure from shrinking to create a seal. Adhesive Lined Heat Shrink Tubing resists salt water, oil, gasoline, and other environmental contaminants.

PRO TORCH

Item Number: 702060

- State of the art Piezo electronic ignition system.
- Up to 120 minutes use on each filling.
- Powerful wind resistant flame.
- Sturdy heavy duty ribbed aluminum body with comfort grip.
- Easily refilled with any brand of butane gas.
- High output flame for large jobs.
- Butane not included.
- Hands-free design.
- Perfect for multiple heat shrink jobs.

ANCOR Recommends

1. Ink marking of colored adhesive lined tubing is permanent after shrinking - ideal for cable or line identification.
2. Adhesive lined tubing can be used for whipping or color coding the ends of line.
3. Legends may be handwritten in ink on ANCOR's regular white ALT where identification of waterproof and strain relieved connections are desired.

ADHESIVE LINED HEAT SHRINK CONNECTORS

ADHESIVE LINED HEAT SHRINK TERMINALS & CONNECTORS

- **ANCOR** heat shrink connectors offer heat activated adhesive built into the sleeve of the heat shrink tubing
- Shrinks to form a water tight seal and the ultimate vibration and strain relief.
- Tinned for corrosion resistance.
- Pure copper for maximum current flow.
- Brazed seam for maximum strength.
- UL Listed and CSA Recognized

257 PIECE HEAT SHRINK CONNECTOR KIT WITH CRIMPER & MINI TORCH

Item Number: 320001

- 110 Assorted 22-10 Heat Shrink Butt Connectors
- 145 Assorted 16-10 Ring Terminals
- 1 Single Crimp Ratchet Tool
- 1 Mini Butane Pocket Torch

See Page 111 for the entire selection of ANCOR kits

ABYC Recommends:

“Current-carrying conductors shall be routed as high as practicable above the bilge water level and other areas where water may accumulate. If conductors must be routed in the bilge or other areas where water may accumulate, the connections shall be watertight. “11.16.4.1.6.” Current-carrying conductors shall be routed as high as practicable above the bilge water level and other areas where water may accumulate. If conductors must be routed in the bilge or other areas where water may accumulate, the connections shall be watertight. “11.16.4.1.6.”

ADHESIVE LINED HEAT SHRINK CONNECTORS

MICRO THERM HEAT GUN

Item Number: 702027

- Features Piezo electronic ignition system, providing flameless heat, safe to use around chemicals or by wire bundles when using deflector.
- Powered by refillable cell.
- Flame temperature up to 650°C (1300°F).
- Ideal for work in the bilge where open flame should not be used.
- Butane Not Included

MINI POCKET BUTANE TORCH

Item Number: 702024

- Electronic ignition system with safety locking switch.
- Flame temperature up to 1300° C (2500°F).
- Compact size allows unit to fit easily into any toolbox.
- Refillable butane cartridge included.
- Butane Not Included

ULTRA THERM HEAT TOOL

Item Number: 702061

- Cordless, simple, safe to operate under any conditions
- Ready to use 15 seconds after ignition
- Tank contains 120 minutes of operation and is refillable by normal butane
- Comes with interchangeable soldering tip, hot blower/deflector and hot knife.
- Replacement orifice assembly available as part # 702062.
- Butane Not Included.

WHITE WRITE-ON IDENTIFICATION TUBING

- Flattened tube of white ANCOR 3:1 heat shrink tubing held by polyester strips.
- Tubing will feed through most typewriters and printers for custom labeling applications.
- Once activated with any heat tool, the printing, whether typed or written with a ball point pen, becomes permanent.
- Three inch sleeves may be cut into smaller lengths.
- Printing is permanent and will not wash off or erode when exposed to oils, moisture, air or most solvents.

Note: The White Write-On Tubing does not have ANCOR's adhesive lining and should not replace our regular heat shrink for terminal ends.

ABYC Recommends:

"Each electrical conductor that is part of the boat's electrical system shall have a means to identify its function in the system." 11.16.2.1.1.

| Recommended Use Range | Diameter | Length(in) | Qty/Pkg | Item Number |

WIRE MANAGEMENT PRODUCTS

NYLON CABLE TIES

- Manufactured from the toughest of materials, pure virgin nylon 6/6.
- Marine Grade™ nylon is insoluble in common solvents, alkalis, dilute mineral acids, most organic acids and most petrochemicals.
- Constructed with either natural or ultraviolet resistant black nylon in both standard and mounting head styles.
- Heavy duty locking mechanism.
- Operating temperature range is 100% capacity up to 65° C, 50% capacity from 65° to 185° C.

LOW PROFILE CABLE TIES

- Very low profile with smooth flexing contoured head, conforms to the shape of wire bundle
- Bundles down to 3/8" diameter
- Easy installation with dikes, side cutters or industry standard "cinch and trim application tools.
- Trimmed stub retracts into cavity, so there are no sharp projections, even if strap is trimmed at an angle
- 'In line' mating design with pick proof underside lock eliminates stress points

CABLE TIE TENSION GUN

Item Number: 700151

- Adjustable tension feature.
- Automatically cuts off the excess strap flush against the cable tie head.
- Professional tool.
- For use with ANCOR cable ties.

ABYC Recommends: “Conductors shall be supported throughout their length or shall be secured at least every 18 inches (455mm) by one of the following methods:” 11.16.4.1.10.

“By means of non-metallic clamps sized to hold the conductors firmly in place. ...The material shall be resistant to oil, gasoline, and water and shall not break or crack within a temperature range of -34°C (30°F) to 121°C (250°F);” 11.16.4.1.10.1.

NYLON CABLE CLAMPS

- Made from nylon for maximum strength
- Resistant to solvents, oils, acids and moisture.
- Unique screw hole alignment feature to speed installation.
- Absorbs shock and vibration; reduces unwanted noise

Screw

Adhesive

ABYC Recommends: "Conductors shall be supported throughout their length or shall be secured at least every 18 inches (455mm) by one of the following methods:" 11.16.4.1.10.

"By means of metal clamps lined with an insulating material resistant to the effects of oil, gasoline, and water." 11.16.4.1.10.3.

SPIRAL WRAP & SPLIT LOOM

- Permits flexible routing of cable harnesses.
- Provides abrasion protection for wire and cable.
- Allows lead outs at any point for greatest ease of installation.

ABYC Recommends:

“When AC and DC conductors are run together, the AC conductors shall be sheathed, bundled, or otherwise kept separate from the DC conductors.” 11.16.4.1.5.

ABYC Recommends:

“Conductors that may be exposed to physical damage shall be protected by self-draining; loom, conduit, tape, raceways, or other equivalent protection.” 11.16.4.1.8.

ABYC Recommends:

“Loom used to cover conductors shall be self-extinguishing. The base product (or resin) shall be classified as V-2 or better, in accordance with UL 94, Tests For Flammability Of Plastic Materials.” 11.16.4.1.9.

GROMMETS AND WIRE SEALS

GROMMETS

- Provide instant abrasion resistance to wires passing through panel holes.
- Flexible black vinyl makes installation simple.

| Hole Size (inch) | (mm) | Inside Diameter (inch) | (mm) | Panel Width (inch) | (mm) | Qty/ Pkg | Item Number |
|------------------|------|------------------------------|------|--------------------|------|----------|-------------|

| 1/4 - 3/4 | | Assortment Combo Pack | | | | 45 | 750000 |

WIRE SEALS

UL 94 V-0

- Made of Nylon 6/6 flame resistant, self extinguishing Buna-N form seal.
- All seals exceed NEMA 4 x or 6 specs
- Overlapping clamping spines allow for superior pull-out protection and resistance
- Strain relief fittings are resistant to salt water, acids, alkalis, alcohol, oils and are non-corrosive for use in the marine environment.
- Good underwater to 300 feet /91.4 m (150 PSIG) provided there is a liquid tight seal between body and housing.
- Provide low cost cable entries into panels and junction boxes.

| Description | For Use with Cable Range (AWG) | Thread Size | Cable Range | Clearance Hole | Body Length | Thread Length | Qty/ Pkg | Item Number |

LAMPS

LAMPS

- Heavy duty glass envelope for break resistance.
- Nickel-plated brass bases prevent corrosion while insuring a positive point-of-contact.
- Filaments, with “rough service” design, permit hours of reliable burning.
- Available in various configurations, tested for dependability.

LED BULBS

Ancor Marine Grade Products is please to offer an innovative, energy efficient and cost effective line of LED products for both Marine and Shore based applications.

Requiring very low current, ANCOR's LED bulbs are currently available as direct, replacements for existing incandescent festoon and double contact bayonet base bulbs. Operating at much lower temperatures than conventional lighting sources, these bulbs

are safe to use around flammable materials and where they could come into contact with a passersby. Furthermore, the new ANCOR LED bulbs are shock resistant, as there are no filaments to crack or shatter.

Ancor Marine Grade Products believes that these LED products will make a great addition or replacement to your current lighting needs on board or on shore.

LED FESTOON BULBS

HALOGEN LAMP ADAPTER BASES

The nickel-plated brass base Halogen Lamp Adapter allows the use of all V style miniature halogen lamps in standard single contact, double contact or medium screw base sockets.

| Line No. | Figure Letter | Description | Qty/Pkg | Item Number |
|----------|---------------|----------------------|---------|-------------|
| 109 | AK | D C Bayonet | 1 | 529381 |
| 110 | AL | Medium Screw | 1 | 529383 |
| 111 | | Screw with Red Cover | 1 | 529385 |

Halogen Lamp Adapter Installation Tips

1. Turn off power.
2. Use wire loop to turn adapter into socket to prevent breakage.
3. Remove wire loop.
4. Wipe clean Halogen Lamp (Do not touch lamp with fingers) and install it into adapter.

LIFE LAMP CALCULATOR

This lamp life nomograph shows the relationship between voltage, current, candlepower and life. Each lamp has a design voltage as well as a nominal operating voltage. This allows the designer of the lamp to tailor the life/output/current draw to meet specific needs, within certain industry standards.

We have chosen to emphasize life and brightness. The rated life is based on the average life of 50% of the lamps tested under laboratory conditions – no vibration, stable voltage, room temperature, and in a vertical position. Any other condition will adversely affect lamp life.

Example: To find the effect of under or over voltage on life, current draw and candle power, read in a horizontal line under % of rated voltage. Thus, a #90 bulb rated at 13v but operating at 14.70v (113% of rated voltage - a high charge rate) would have 107% of rated current draw, 155% of rated candle power, but would only last 23% of its rated life.

CIRCUIT BREAKERS, SWITCHES & ACCESSORIES

CIRCUIT BREAKERS

- Provides reliable automatic circuit protection, power switching, and circuit overload control.
- Designed to ignore nuisance trips, provides a trip-free safety mechanism which cannot be held closed during overcurrent or fault conditions.
- Constructed with the highest marine grade™ stainless steel springs and specially plated sub-components.
- The magnetic actuator provides greater reliability than thermal actuators.
- Provides over 10,000 switching cycles.
- Weather resistant construction passes 100 hour salt spray tests.

ANCOR MAGNETIC WORLD CIRCUIT BREAKERS TESTED & CERTIFIED FOR MARINE USE IN NORTH AMERICA AND EUROPE IMPROVED DESIGN • SUPERIOR OVERCURRENT PROTECTION

- Now certified in North America and Europe, meets the needs of all worldwide markets!
- Tested and certified by most widely recognized international regulatory agencies including UL (Underwriters Laboratory), CSA (Canadian Standards Association), CE (European Union), VDE (German government approval) and TVU Certified
- Designed for applications requiring higher amperage and voltage handling capability in a compact design
- Protects wiring, motors, generators, telecommunication systems, batteries, and many other applications in the harsh marine environment, fits common panel cutouts
- Mechanical Endurance: 10,000 On-Off operations @ 6 per minute; with rated current & voltage
- Breakers will trip on overload even when actuator is forcibly held in the ON position
- Enhanced, upgraded design of ANCOR standard single and double pole breakers

SEALED ROCKER SWITCHES

SEALED ROCKER SWITCHES

UL 1077 Recognized

- Certified for prolonged submersion under pressure (front panel sealing) and UL Ignition Protected.
- Panel redesign is quick and easy, requiring no tooling change, with removable inter-changeable actuators
- Seals out water, dust and debris, locks out elements. Certified to IP66/IP68.
- Withstands extreme temperatures. Roller pin mechanism eliminates need for lubricants, so it can withstand from -40°C to + 85°C.
- Endurance: 150,000 cycles minimum
- Rating: 20 AMP at 12V, 10 AMP at 250 VAC, 15 AMP at 125 VAC

FUSES & ACCESSORIES

FUSES

- Fast-acting, corrosion resistant fuses open quickly to protect circuits from overloads and short-circuits.
- Time-delayed to allow temporary, harmless in-rush currents to pass but open on sustained overloads and short-circuits.
- Each fuse tested twice to ensure highest quality.
- Available in sizes to fit every need.

MARINE FUSES

AGC (UL 248-14)

MDL (UL 248-18)

With weather resistant cap and tinned copper wire for corrosion resistance

314 PIECE ATO/ATC & AGC FUSE KIT

Item Number: 608001

- 20 ea. 1, 7.5, 25 and 30 AMP AGC Fuses.
- 25 ea. 2, 3, 5, 10, 15 and 20 AMP AGC Fuses.
- 15 ea. 5, 10, 15 and 20 AMP ATO/ATC Fuses.
- 5 ea. 25 and 30 AMP ATO/ATC Fuses.
- 4 AGC Panel Mount Fuse Holders.
- 4 AGC Waterproof Fuse Holders.
- 3 AGC In-Line Fuse Holders.
- 2 ATO/ATC In-Line Fuse Holders.
- 1 Fuse Puller/Installer.

“All electrical circuits must be protected from too much current flow, which can cause wire conductors to overheat and wire insulation to burn, and can damage internal circuits in individual appliances”.

Circuit protection on board a boat must be taken seriously. A potentially devastating electrical fire can result when too much amperage travels through a wire and enough heat is generated to melt and burn the wire insulation and surrounding materials, causing a fire”.

Kevin Jeffrey
DYI Magazine

TOOLS & METERS

TOOLS AND METERS

To complement our quality electrical products we offer a complete line of cutters, strippers, heat and crimp tools and electrical meters for professional results. Our quality tools are designed to provide precise crimps and ease of use in installation and maintenance of your boat's electrical system.

LIVE WIRE

Item Number: 702034

- Adjustable sensitivity allows tracing of unshielded wires directly behind walls, at switches or receptacles, or at low-voltage locations
- Visual (flashing) and audible (beeping) indicators signal presence of voltage
- Adjustable sensing levels
- Built in "safe test" feature assures batteries are operating properly

WIRE TRACKER™

Item Number: 702086

- Generates distinct tone usable for wire and cable tracing
- Direct connection to RJ-11 and co-axial jacks, automotive fuse sockets, and exposed, unenergized wires
- The transmitter is a compact, hand-held instrument designed to generate a distinct tone in any unenergized wire or cable
- Tone can be picked up with the Wire Tracker™ receiver. An LED acts as a visual indicator to show that the unit is on

CONTINUITY CIRCUIT TESTER

Item Number: 702077

- Tests for continuity in non-energized circuits
- Fully shielded indicator bulb
- Insulated test lead with alligator clip
- 1-AAA battery not included

LOW VOLTAGE CIRCUIT TESTER

Item Number: 702082

- Constructed of tough, durable plastic
- Compact size for portability
- Bright visual indicators
- 1-AAA battery not included

TRUE RMS AC/DC DIGITAL CLAMP-ON METER (1000A)

Item Number: 702079

- 3w LCD with max. reading of 3999, true RMS measurements (45Hz to 1Khz)
- AC/DC voltage measurement to 600V, AC/DC current measurement to 1000A
- Frequency measurement to 4MHz
- DCA zero adjustment knob, continuity and diode test
- 9V battery included, auto ranging
- Peak hold, jaws can clamp around one 750 MCM or two 350 MCM cables

CLAMP-ON VOLT METER

Item Number: 702070

- Measures AC and DC current up to 200 Amps
- Easy to use, just clamp jaws around either power lead
- Accurate to 10mA (40 Amp range), "One touch zero" insures accuracy
- Reads minimum and maximum for circuits that fluctuate, data hold button stores last reading
- Measures resistance and conductivity, measures AC frequency

4-FUNCTION, 6-RANGE DIGITAL MULTIMETER

Item Number: 702071

- Measures to 20-200V DC, 500V AC, measures DC current to 200mA.
- Measures resistance to 2000 Ohms, autoranging in AC voltage range only.
- Easy-to-read 32" digital LCD display, tests for continuity.
- Includes batteries, test leads, owner's manual and carrying case.
- Fused overload protection, replacement fuse GMA .5A/250V.

POCKET-SIZE 7-FUNCTION, 19-RANGE DIGITAL MULTIMETER

Item Number: 702072

- Measures to 1000V DC, 750V AC, measures AC/DC current to 10 Amps.
- Measures resistance to 2 MEG Ohms, measures temperature to 1832°F.
- Easy-to-read 32f digital LCD display, continuity beeper.
- Temperature test with bullet probe (included). 9V battery included.
- Fused overload protection except for 10 Amp, replacement fuse GMA .25A/250V.

TOOLS AND METERS

15-FUNCTION, 32-RANGE AUTORANGING DIGITAL MULTIMETER

Item Number: 702078

- Measures to 1000V DC, 750V AC, measures AC/DC current to 10 Amps.
- Measures resistance to 32.6M Ohms, measures capacitance to 32.6μ FARADS.
- Measures frequency to 200KHz, measures input impedance to 10 MEG Ohms.
- Easy-to-read 32" digital LCD display, includes heavy-duty test leads and instruction manual.
- 9V battery included, low battery indicator, audible continuity beeper <50 Ohms.
- Protective rubber shell with bench stand and built-in lead storage.

10-FUNCTION, 32-RANGE DIGITAL MULTIMETER

Item Number: 702073

- Measures to 1000V DC, 700V AC, measures AC/DC current to 10 Amps.
- Measures input impedance to 2 MEG Ohms.
- Easy-to-read 32f digital LCD display, includes heavy-duty test leads & instruction manual.
- Protective rubber shell with bench stand and built-in lead storage.
- Fuse protected up to 10 Amps, 9V battery included.
- Auto power off, low battery indicator, audible continuity beep.

5-FUNCTION, 12-RANGE

Item Number: 702074

- Measures to 500V DC, measures DC current to 250 mA.
- Measures resistance to 2MEG Ohms, measures capacitance to 32.6μ FARADS.
- Measures -20dB to 56dB on AV Volt Ranges.
- Includes two safety test leads, instruction manual and AA battery.
- Impact resistant shell, convenient, pocket-size instrument.
- Replacement Fuse GMA .5A/250V.

AUTOMATIC WIRE STRIPPER

Item Number: 702030

- Made of reinforced polyimide
- Automatically adjusts to different wire sizes.
- Strips without damage or marking of conductors, slim jaw for easy access, steel side cutter.
- Strips and cuts wire from 24 AWG /0.2 mm² to 12 AWG /3 mm².
- Wire stop adjusts length of strip from 3/8" /9.5 mm to 1/2" /12.7 mm.

COAXIAL CABLE STRIPPER

Item Number: 702050

- Made of fiberglass reinforced polyimide.
- Sharp blades strip outer and inner insulation of coaxial.
- Will not damage center conductor or braided shield.
- Marked for easy stripping length.
- Strips RG58, RG59, RG8X and RG62.

BATTERY CABLE STRIPPER

Item Number: 702065

- Made of fiberglass reinforced polyimide, swivel blade for circular and longitudinal cuts.
- Adjustable blade cutting height, comes with extra blades.
- Strips 8 AWG /8 mm² to 4/0 AWG /103 mm² battery cable.
- Slits outer jacket from 14/2 to 6/2 AWG /2x2 mm² to 2x13 mm² duplex and 16/3 to 6/3 AWG /3x1 mm² to 3x13 mm² triplex wire.

CABLE TIE TENSION GUN

Item Number: 700151

- Adjustable tension feature.
- Automatically cuts off the excess strap flush against the cable tie head.
- Professional tool.
- For use with ANCOR standard cable ties.

TOOLS AND METERS

WIRE AND CABLE CUTTER

Item Number: 702005

- Precision ground and sharpened blades, high strength steel.
- Contoured cushion grip.
- Capacity: 22 AWG /0.3 mm² to 2/0 AWG /62 mm² copper wire & cable (not for steel).

HEAVY DUTY LUG / TERMINAL CRIMPER

Item Number: 702040

- Calibrated adjustment screw.
- Compound lever action prevents operator fatigue.
- Capacity: Crimps 8 - 4/0 AWG /8-103 mm² lugs and terminals.

HEAVY DUTY CABLE CUTTER

Item Number: 702006

- Precision ground and sharpened blades
- High strength steel
- Longer handle allows easier cuts with less strain.
- Lightweight fiberglass handles feature comfortable rubber grips
- Cuts non-ferrous cables up to 350 MCM /177 mm² (2 sizes larger than 4/0 AWG /103 mm²).

HEAVY DUTY LUG CRIMPER

Item Number: 701010

- Spring loaded pivot bar, designed for use with a hammer or vise.
- Makes UL approved crimps.
- Made from steel with a hardened pivot pin.
- Capacity: Crimps 6 - 4/0 AWG /13-103 mm² lugs and 6 - 3/0 AWG /13-81 mm² terminals.

made in  USA

STAINLESS STEEL CUT/STRIP/CRIMP TOOL

Item Number: 701009

- Crimp 10-22 AWG insulated and non-insulated terminals and coaxial connectors
- Cut and strip 8-22 AWG solid and 10-24 AWG stranded wire
- Cut and rethread 4-40, 5-40, 6-32, 8-32, 10-24, 10-32 screws
- Stainless steel blade resists corrosion and nicking
- Molded ergonomic handles make tool easier to grip for stronger crimping
- Precision ground plier nose

SINGLE CRIMP RATCHET TOOL

Item Number: 702010

- Full cycle crimps on ANCOR connectors, recommended for Heat Shrink Connectors.
- Jaws are hardened 4150 steel with hardened centerless ground pins adjustable for wear.
- Capacity: Crimps terminals and connectors from 22 - 10 AWG /0.3-5 mm² in three color-coded cavities.

CUT/STRIP/CRIMP TOOL

Item Number: 701007

- Precision ground cutters and stripping station, wide crimp range of insulated and non-insulated terminals.
- “Box” crimp works with **ANCOR** double crimp terminals, marking is embossed and paint filled.
- Capacity: Crimps 22 - 10 AWG /0.3-5 mm² insulated and non-insulated terminals, connectors and spark plug terminals inspecial cavities.
- Strips insulation from 22 - 10 AWG /0.3-5 mm² solid and stranded wires.
- Cuts 4 - 40/2 mm, 6 - 32/4 mm, 8 - 32/4.8 mm, 10 - 32/ 6.4 mm and 10 - 24/6.4 mm bolts.

DOUBLE CRIMP RATCHET TOOL

Item Number: 702017

- Ratcheting action insures positive crimps, includes release lever.
- Two nests in crimp cavity simultaneously crimps conductor and insulation for maximum strain and fatigue relief.
- Compound lever handle for operator ease.
- Crimps 22 - 10 AWG /0.3-5 mm² terminals and connectors in three color-coded cavities.

DOUBLE CRIMP RATCHET TOOL

Item Number: 702015

- UL and ABYC recommended crimps. Will not release until proper crimp is made.
- Jaws are hardened 4150 steel with hardened centerless ground pins adjustable for wear.
- Has two nests within each cavity to simultaneously crimp the conductor and make a swage type crimp on wire insulation.
- Crimps 22 - 10 AWG/0.3-5 mm² terminals and connectors in two color-coded cavities.

DOUBLE CRIMP RATCHET TOOL

Item Number: 701030

- Ratchet mechanism crimps stranding and insulation grip portion of **ANCOR** connectors all in one motion for superior strain relief.
- Tool has adjustment feature to allow for wear, and a release lever in event of incorrectly placed terminal.
- Crimps 22 - 10 AWG insulated terminals in three cavities.

TOOLS AND METERS

NON-INSULATED SINGLE CRIMP DIE

Item Number: 701022

- Crimps non-insulated, single crimp terminals.
- Capacity: 22 - 8 AWG /0.3-8 mm² non-insulated terminals.

RG59/RG6 COAX DIE

Item Number: 701026

- Crimps F-type CATV connectors.
- Capacity: Crimps connectors on RG59 and RG6.
- Die has .262/6.7mm, .323/8.2mm and .354/9.0mm hex cavities

RG8/RG213 COAX DIE

Item Number: 701029

- Crimps UHF and N-series connectors.
- Capacity: Crimps connectors on RG8 and RG213.
- Die has .080/2.0mm, .100/2.5mm and .405/10.9mm hex cavities

WIRE STRIP / CRIMP TOOL

Item Number: 702033

- Strips 26 to 10 AWG stranded wire.
- Automatic jaw-load wire stripper self-adjusts to strip wire.
- Crimps 22-10 AWG insulated terminals.

MINI POCKET BUTANE TORCH

Item Number: 702024

- Electronic ignition system with safety locking switch.
- Flame temperature up to 1300° C (2500°F)..
- Compact size allows unit to fit easily into any toolbox.
- Refillable butane cartridge included.
- Butane Not Included.

MICRO THERM HEAT GUN

Item Number: 702027

- Features Piezo electronic ignition system, providing flameless heat, safe to use around chemicals or by wire bundles when using deflector.
- Powered by refillable cell.
- Flame temperature up to 650°C (1300°F).
- Ideal for work in the bilge where open flame should not be used.

PRO TORCH

Item Number: 702060

- State of the art Piezo electronic ignition system.
- Up to 120 minutes use on each filling.
- Powerful wind resistant flame.
- Sturdy heavy duty ribbed aluminum body with comfort grip.
- Easily refilled with any brand of butane gas.
- High output flame for large jobs.
- Hands-free design.
- Perfect for multiple heat shrink jobs.

HEAT GUN

Item Number: 702025

- 2 Heat settings, 500° F /260° C, & 1000° F /538° C.
- Lightweight, 1 lb. /0.5 kg.
- 120 Volts AC, 1200 Watts Max.
- UL Listed.
- Great for shop use or in areas where open flames cannot be used.

ULTRA THERM HEAT TOOL

Item Number: 702061

- Cordless, simple, safe to operate under any conditions
- Ready to use 15 seconds after ignition
- Tank contains 120 minutes of operation and is refillable by normal butane
- Comes with interchangeable soldering tip, hot blower/deflector and hot knife.
- Replacement orifice assembly available as part # 702062.
- Butane not included.

TOOLS AND METERS

TURBO LITE

Item Number: 702064

- Child resistant piezo electronic ignition system.
- Powered by butane, inexpensive and readily available
- Flame temperature up to 1300°C/2500°F.
- Windproof and weatherproof flame.
- Flame may be locked in “on” position.
- Very small and easy to carry. Ideal for quick jobs.

DIELECTRIC SILICONE COMPOUND

Item Number: 700115

- Fights oxidation to improve conductivity.
- Penetrates aluminum oxide to maintain current paths.
- Temperature rated 40°-500°F.
- 1/3 oz tube.

TOOL PRO PACK

Item Number: 700002

- Six of ANCOR's bestselling professional tools, that will complete any electrical toolbox.
- Includes:
 - Automatic Wire Stripper** (Part # 702030)
 - Battery Cable Stripper** (Part# 702065)
 - Wire and Cable Cutter** (Part # 702005)
 - Heavy Duty Lug Crimper** (Part # 701010)
 - Double Crimp Ratchet Tool** (Part # 701030)
 - Ultra Therm Heat Tool** (Part # 702061)
- Available at discounted price

WEEKENDER PACK

Item Number: 700003

- The essential tool pack to complete your quick electrical needs
- Includes:
 - Stainless Steel Cut/Strip/Crimp Tool** (Part # 701009)
 - Continuity Circuit Tester** (Part # 702077)
 - Mini Pocket Butane Torch** (part # 702024)
- Available at discounted price

COMPLETE ELECTRICAL MERCHANDISER

Item Number: DR1088

The DR1088 is **ANCOR's** premier merchandiser. Designed as an end cap or free standing gondola, this eye catching 4' wide x 6' high heavy duty display provides the retail dealers with a complete selection of our most popular Marine Grade™ products. The bottom section offers the most popular colors and sizes of primary wire, battery cable, duplex, triplex, and coaxial cable to be sold by the foot. The top section includes consumer packs of our most popular terminals, lugs, lamps, mini-spools, fuses, cable ties and heat shrink tubing products. The DR1088 electrical merchandiser comes complete with a planogram, the necessary hooks, re-order tags and three heavy duty steel wire baskets designed to dispense the spools of wire.

ALSO AVAILABLE

DR1089 Merchandiser:

Duplicate product selection as DR1088; with hooks, reorder tags, wire baskets included. No gondola included. (To be used with existing pegboard or store wall)

DR1091 Merchandiser contains only the packaged product from the DR1088.

HEAT SHRINK TUBING KITS

UL 224

| Description | Diameter | Length | Qty/ Pkg | Item Number |
|-----------------------|-------------|--------|-------------|----------------|
| Black | 3/16 - 3/4" | 3" | 8 | 301503 |
| Adhesive Lined Tubing | | 6" | 8 | 301506 |
| Assorted Colors | 3/8" | 3" | 5 | 304503 |
| Adhesive Lined Tubing | | 6" | 5 | 304506 |
| Assorted Colors | 3/4" | 3" | 4 | 306503 |
| Adhesive Lined Tubing | | 6" | 4 | 306506 |
| | | 12" | 4 | 306524 |

Cross Linked polyolefin tubing is much stronger than PVC tubing and will not burn like PVC.

Heat activated adhesive lining provides impervious seal to salt water, oil, acids, and sunlight as well as providing strain relief.

Highest shrink ratio - shrinks to 1/3 original size.

Shrinks at 257° F/125° C.

Operating temperature range of -40° C to 110°C.

HEAT SHRINK CONNECTORS

| Description | Length | Qty/ Pkg | Item Number |
|--------------------------|---------|-------------|----------------|
| Assorted Butt Connectors | 22 - 10 | 10 | 300000 |

ANCOR heat shrink connectors offer adhesive built into the sleeve of the heat shrink tubing

Shrinks to form a water tight seal and the ultimate vibration and strain relief.

Tinned for corrosion resistance.

Pure copper for maximum current flow.

Brazed seam for maximum strength.

Nylon insulator, preferred by experts, for Marine Grade™ resistance to sunlight, water, oil, chemicals, vibration and cut-through damage.

CABLE TIES

| Description | Length | Qty/ Pkg | Item Number |
|-----------------------------|--------|-------------|----------------|
| Assorted colors | 8" | 24 | 350024 |
| Assorted Natural & UV Black | 4 - 8" | 25 | 350025 |

Manufactured from the toughest of materials, pure virgin nylon 6/6.

Nylon is insoluble in common solvents, alkalis, dilute mineral acids, and most organic acids and petrochemicals.

Constructed with either natural or ultraviolet resistant black nylon in both standard and mounting head styles.

Operating temperature range is 100% capacity up to 65° C, 50% capacity from 65° to 185° C.

Item Number 350024

KITS

NYLON CABLE CLAMPS

| Description | Color | Qty/ Pkg | Item Number |
|-------------|---------|-------------|----------------|
| 1/8 - 1/2 | Natural | 54 | 400000 |

Made from nylon for maximum strength
Resistant to solvents, oils, acids and moisture.

Unique screw hole alignment feature to speed installation.

Absorbs shock and vibration; reduces unwanted noise

FUSES

| Description | Qty/ Pkg | Item Number |
|---|-------------|----------------|
| ATM Combo Pack (1 ea of 5, 10, 15, 20, & 30 Amps) | 5 | 601110 |
| Marine AGC Fuses (5 Amps - 30 Amps) | 5 | 601112 |
| Deluxe AGC Fuses (1 Amps - 30 Amps) | 41 | 601113 |
| ATO/ATC Fuses (5 Amps - 30 Amps) | 6 | 601114 |

Fast-acting, corrosion resistant fuses open quickly to protect circuits from overloads and short-circuits.

Time-delayed to allow temporary, harmless in-rush currents to pass but open on sustained overloads and short-circuits.

Each fuse tested twice to ensure highest quality.

Item Number 601110

MARINCO ELECTRICAL GROUP BRANDS

AFI is the leading supplier of horns and windshield wiper systems for the marine marketplace, with over 50 years of experience. AFI offers a complete line of marine horn products designed to meet almost any need including: electric and air trumpet horns, compact horns, electric and air below deck horns, and a comprehensive line of drop-in horns with a wide assortment of grill options. AFI's broad product line also includes: quality wiper systems, teak furniture, cabin and galley accessories crafted of the finest teak available, fishing equipment, boarding platforms and ladders.

NICRO is the largest supplier of solar ventilation to the marine industry. When moisture forms in a closed cabin, damage can occur to fabrics, electronics and even the boat's fiberglass. Active solar ventilation is proven to be the most effective way to prevent the buildup of mold and mildew in a stored boat, resulting in effective boat storage.

Many safety issues also arise from lack of ongoing ventilation. Fumes and gases, ranging from carbon monoxide to hydrogen gas, can be unsafe. Open flame devices in the cabin also require ventilation. NICRO systems help to eliminate these hazards by providing constant air circulation and effective safety ventilation.

For more information on AFI and NICRO's complete product lines, visit www.marinco.com or call 707-226-9600 to request a master catalog.

MARINCO, founded in 1972, is an industry leader in shorepower systems for the marine marketplace. MARINCO's many trademarked products are corrosion resistant, with unique, interconnecting systems. The result: positive and moisture proof connections.

MARINCO parts are made from the highest quality materials and are designed to last for years in harsh conditions that can be found in marine environments.

MARINCO products are the leading choice of boat builders worldwide and can be found at retailers everywhere. MARINCO products are UL listed and CSA approved. For more information on MARINCO's complete product line, visit www.marinco.com or call 707-226-9600 to request a master catalog.

GUEST, with over 35 years of experience in design and manufacturing is an industry leader in battery management products.

GUEST battery chargers/power centers are the finest electrical products available for use in the harsh marine environment. GUEST pioneered the process of fully encapsulating charger electronics in potting material which provides the user with years of trouble free, safe and efficient charging.

Our product offering has evolved to serve virtually any boating need. Whether your charging needs are for trolling motor battery replenishment, offshore fishing boat power at the dock or cruising, we've got a product for you. For more information on the complete GUEST product line, visit www.guestco.com or call 707-226-9600 to request a master catalog.

Recognized internationally as a leader in innovative design and development, BEP Marine, Ltd. manufactures a complete line of AC and DC control panels, waterproof switch panels, battery switches and distribution products, digital monitoring systems and gas detectors. In 2005, BEP opened a North American distribution center in Peachtree, Georgia which stocks their full range of products. This has allowed BEP to increase inventory in the U.S. and react quickly to new orders.

BEP's breadth of products meet or exceed USCG/ABYC specifications where required, is an ISO 9001:2000 certified manufacturer, and is used by top boat manufactures around the world, including US Marine, Chaparral, Monterey, Sea Ray, Beanneteau, Grand Banks and Riviera Yachts, to name only a few. For more information on BEP Marine's complete product line, visit www.bepmarine.com.
