PATENT PENDING

## SANDLESS SANBAGS

Stack and stagger multiple Sandless Sandbags to build a retaining wall to protect from flood water

### Just Add Water

Activates at point of use when exposed to water

Compact and light-weight for storing but will grow to 32 lbs. in times of need.

## FLOOD BARRIERS

Place 5', 10' or 17' barriers in front of driveways or garages to divert water and prevent damage

Around exterior windows

Around bulk head doors

Divert water flow

### PRODUCT DETAILS

- Contain a super absorbent that swells & gels with water
- Gelled water creates a barrier to contain or divert water
- Stack Quick Dams to increase barrier height
- Build a retaining wall in just 15 minutes
- Safe, Non Hazardous & Non-Toxic
- Environmentally friendly and will naturally decompose over time

### BENEFITS

- Compact
- Light weight - 1 lb each
- No Sand or Labor Needed
- Ready to Use
- Use for up to 8 months
- No Mess
- Easy to carry several at a time
- Effortless & Quick to deploy
- Dispose in trash when no longer needed
- Use indoors or outdoors
